Water Conditioning System

SYSTEM CABINET

*Contains the
Regenerant used in
refreshing the
system's media bed.*

HEAVY DUTY POWERHEAD

*The heart of the
system features a
single, heavy-duty
motor. Used to time
regeneration cycles,
it is both reliable
and economical.*

INTEGRATED RESIN TANK

*The resin tank, which
is housed within the
brine cabinet, contains
the filtering media of
the system which
removes impurities.*

BENEFITS OF SOFT WATER

PLUMBING

PIPE PROTECTOR

Over a period of time, scale forms and can clog your plumbing. As the pipes clog, water flow is restricted and water pressure can be reduced dramatically. A water conditioning system can minimize this headache.

KITCHEN

DISH SPARKLER

Tired of streaks and spots on glassware and dishes?

Conditioned water eliminates the problem, and dishwasher last longer, too!

BATHROOM

BODY REFRESHER

Bring conditioned water to your shower and you'll feel a refreshing difference. You'll wash cleaner, faster and with no soap build up on your skin.

GENERAL CLEANING

SCRUBBING HELPER

Washing floors, tile and woodwork is easier and faster with conditioned water because it eliminates the film and soap scum caused by hard water.

STAIN ELIMINATOR

Your kitchen and bathroom fixtures will benefit from conditioned water. No more unsightly rings, stains or mineral build up to darken your porcelain or your day.

LAUNDRY SOAP SAVER

Hard water impairs the cleansing strength of detergents. Conditioned water not only delivers greater washing power, it reduces soap requirements by up to 70% and protects your washing machine at the same time.

MONEY STRETCHER

The expense of your cleaning supplies will reduce dramatically with conditioned water because you'll use less soap and fewer harsh chemicals and detergents to get the job done.
