

# Softens • Refines • Filters

## Three tanks in one. Built to last.

1. Blow-molded plastic inner tank.
2. Strong multi-fiberglass filament-wound center tank.
3. Ultra-high gloss insulated outer jacket.

1. PLASTIC INNER TANK
2. FIBERGLASS CENTER TANK

3. INSULATED OUTER TANK

## Stop your household budget from going down the drain.

The Water Research Council estimates that the average homeowner spends hard earned money on hidden hard water costs like damaged pipes, faucets, water heaters, washing machines and clothing, as well as wasted soap products.

ACTIVATED CHARCOAL

RESIN BED

PVC MANIFOLD & DISTRIBUTOR

SILICA FILTER BED

## More than a softener, it's like having three units in one.

**1** It's a refiner. The water flows through an activated charcoal filter to remove unpleasant tastes and odors.

**2** It's a water softener. The resin bed softens the water to Zero Soft.

**3** It's a filter. Finally, the water passes through a high-grade silica "polishing" the water to a high clarity.
